Greetings Laurence,

Hope all is going well with you and the Sanctuary.

I thought I would update you on our experiences using Theragem at The Riversong Center. Since acquiring the unit and your excellent training some eight months ago I have used Theragem daily in my clinic. We have had very good results with a wide variety of ailments. In particular psoriasis and eczema respond well, as do thyroid disorders-both hyper and hypo-thyroid. We are applying Theragem to a variety of autoimmune disorders with promising results. Depression, anxiety, hypertension and hyperlipidemia have been treated with success. Treatment of a fatty liver (an extremely common CT finding in the U.S.) is dramatically effective. One twenty minute session powerfully de-fats the liver and the patient will experience an immediate steatorrhea that often lasts for two days. We have several cancer patients who have failed traditional treatments (no surprise) who are doing quite well using Theragem in addition to nutritional and supplement programs.

On the shamanic side, we consistently see strong reactions to the assemblage point process. This is the most singular demonstration that we are addressing the human energy field holistically, not just fixing parts in a machine.

Finally, I know each day, with each patient that I am a neophyte, holding a tool that teaches me something new and powerful on a regular basis.

Thanks for bringing Theragem over the pond. I must say that it fits perfectly with The Land of Enchantment.

Take Care,

Brad Haire D.O.
